DETAILED ACTION

Reasons for Allowance

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Woodhead et al. (U.S. Patent No. 5,640,388) teaches of removing jitter and correcting timestamps in a packet stream by receiving the packets with timestamps at a buffer at an intermediate site. From there the timestamps output at a controlled rate. Woodhead does not teach of averaging the timestamps and then taking the average of that average.

Christos Tryfonas and Anjuan Varma's "**Restamping Approach to Clock Recovery in MPEG-2 Systems Layer**" teaches of receiving MPEG-2 packets with PCR timestamps and sending them to the phase-locked loop. The article fails to teach of sending the variable rate timing signal through another loop to get the stable timing signal.

Dara (U.S. Patent No. 5,184,350) teaches of synthesizing clock signals at the first phase-locked loop and monitoring them at a second phase-locked loop. The second phase-locked loop can also synthesize the clock signal. The output goes into another phase-locked loop circuit, however the clock signals are not timestamps for received packets and that changes the scope of the art to one different than the subject matter claimed in this instant application.

Therefore, the prior art of record fails to anticipate or render obvious the claimed combination of a method or system for guaranteeing an upper bound on output jitter while maintaining maximum loop bandwidth.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
